Raleigh, NC 27699-1646

**Re: Revised Additional Site Investigation Report  
Chemours Fayetteville Works  
Fayetteville, North Carolina  
EPA ID No. NCD 047 368 642**

Dear Dr. Ghiold:

Enclosed, please find a PDF copy of the revised *Additional Investigation Report* for the Chemours Fayetteville Works. The report, initially submitted on January 31, 2018, was revised based on comments received via email (dated February 9, 2018) and comments provided by yourself in a March 23, 2018, meeting. In addition to this electronic submittal of the report (text, tables and figures), two hard copies of the full report that include a CD containing the full lab reports are being shipped to you at your North Carolina Department of Environmental Quality (NCDEQ) office.

Chemours is pleased to provide this revised report on the results of the investigation and the initial conclusions drawn to date from these additional data. We want to emphasize that as we collect and analyze these and additional information and data, we recognize that our understanding will evolve and there may be additional findings, assessments and conclusions to share. Chemours will timely communicate new learnings and interpretations to DEQ and will continue to work to address these issues collaboratively with the agency.

If you have any questions or need additional information, please feel free to contact me at 704-560-6435.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Kevin Garon". The signature is fluid and cursive, with the first name "Kevin" and last name "Garon" clearly distinguishable.

Kevin Garon  
Project Director  
Chemours Corporate Remediation Group
